“Free the child’s potential and you will transform him into the world”

-Dr. Maria Montessori

Dr. Maria Montessori was an Italian physician, educator and innovator acclaimed for her educational method that builds on the way children naturally learn.

Dr. Maria Montessori’s Pedagogy:

Montessori method of education developed by Dr. Maria Montessori is a child centred educational approach based on scientific observations of children from birth to adulthood. Dr. Maria Montessori’s methodology has been time tested, with over 100 years of success in diverse cultures throughout the world. Dr. Maria Montessori’s whole approach to education was in the spirit of constant experimentation based on the observation of the child. One of Montessori’s primary goals was to promote the development of social skills, emotional growth, and cognitive preparation so every child could fulfill their utmost potential. She believed that the potential of the child is not just mental, but is revealed only when the complete “Montessori Method” is understood and followed. The child’s choice, practical work, care of others and the environment, and above all the high levels of concentration reached when work is respected and not interrupted, reveal a human being that is superior not only academically, but emotionally and spiritually, a child who cares deeply about other people and the world, and who works to discover a unique and individual way to contribute.

This is the essence of real “Montessori” work today.

vs.

Montessori School

Traditional School

School meets needs of the students.

Students fit mold of the school.

Curriculum is structured for each child.

Curriculum is structured for the whole class.

A discovery model of learning where students learn concepts from working with materials.

Learn only from instruction, no room for discovery.

Multi-sensory materials for physical exploration organizes program for learning care of self and environment.

No organised program for self-care, left primarily upto parents.

Children are encouraged to speak and work in groups.

Children usually work silently at their desk.

Cognitive social, emotional and moral development emphasis.

Social development emphasis.

Uninterrupted work cycles.

Block time, period lessons.

Teacher acts as a facilitator.

Teacher lectures.

Mixed age groupings.

Same age groupings.

Child identifies own errors from feedback from the educational material.

Teacher identifies errors.

Goals and Beliefs of VEDA MONTESSORI

MONTESSORI EDUCATORS BELIEVE CHILDREN :

- Are intrinsically motivated.
- Have no need for rewards to encourage them.
- Have an innate and insatiable desire to learn new ideas and skills.
- Are driven by their desire to become independent, capable people.

THE MAIN GOALS OF VEDA MONTESSORI ARE :

At Veda Montessori, our aim is to give every child an education for life. The knowledge that is imparted through the Montessori way prepares them to be a citizen of the world. The life skills they will learn will always hold them in good stead. Your child is like no other and this unique method of education will bring out the best in them. We will follow your child's instincts, not the other way round.

MOST PARENTS CHOOSE TO SEND THEIR CHILDREN TO A MONTESSORI SCHOOL BECAUSE THEY :

- Are passionate about their children's education.
- Believe in the Montessori Principles.
- Know that their children will grow in a respectful, safe, multi-cultural environment.

- Our Program -

Mother Toddlers

6 months - 14 months

Toddler Environment

14 months - 3 years

After School Program

3 years - 6 years

- About Khushbu -

The Vedas, as we all know, are four collections that form the earliest body of Indian scriptures. Taking from their teachings on philosophy and guidance, the word Veda stands for knowledge and the highest quality of education. So when I was thinking of a name, I zeroed in on 'Veda'.

I, Ms. Khushbu Parikh educator / now owner of Veda Montessori always had a dream start a school. I am a mother of 2 year old and my daughter goes to a Montessori school and I am so convinced with this methodology which works wonders with these young minds. After studying this methodology I set up a toddler environment (1-3 years). Having an experience of 10 years with preschool children, I am very passionate working with such young children.

Enhancing on all the teaching mechanisms of a regular nursery school, Veda Montessori will go several steps further. We follow pure Montessori methodology. We want our class to be intimate, where everyone, including the teachers and children, knows each other well. That is why we have decided on having less number of children per class. (i.e. 12 per batch) They will be aided by two qualified teachers and one helper. Fifteen in each class is the ideal size for our little family. The knowledge imparted through Montessori Method can help maximize children inner potential and create them better citizen of world.

The education of even a small child, therefore does not aim at preparing him for school, but for life.

--Maria Montessori--

Sincerely,
Khushbu Parikh.
Educator.
